

To: TPS board

What is the point of having public consultations if you just ignore everything that is said and do absolutely nothing to resolve any issues?

Many times I have reported the next terrorist event with name/date/place calling 911 does not work all they do is say "Not out catchment area." Nothing has been done to change your best practices despite many 5 minute deputations to the board, new information continues to be squandered.

In general police are just too stupid to deal with any kind of new technology or AI systems as I know from first hand experience talking to desk sergeants who are clearly brain dead. Thus I recommend you defund TPS and reinvest the monies into a remote viewing program that can correctly predict future events with name/date/place as i have been doing since 1990 without any funding.

Just search your inbox for the "Bataclan Theatre" and "Coronavirus" mass email warnings oh yeah that is right the review into mcArthur has this documented and the fbi have a carbon copy same time as TPS prior to event of the criminal incidents.

I have heard from USG authorities that they are looking into it.

Have a nice day.
